I am a Software Engineer with huge passion of learning new things. I am familiar with PHP framework (Laravel & CI) and Golang framework (Gin Gonic). Currently I am interested with DevOps area specifically in docker environment, CI/CD, and Linux Server Administration. I enjoy cooking and adventure on my spare time.

EMPLOYMENT HISTORY

Software Engineer • Telkomsel

Feb 2022 - Present

- Learning and improving our unique framework for memory management and low latency/high throughput systems
- Provide Tier 2 support to issues escalated from Service team. Interface with development teams to resolve Tier 3 issues
- Research, design, develop and implement solutions for fault, performance, capacity and monitoring for applications
- Effectively manage day-to-day tasks in an Agile process to meet scheduled commitments and participate in Agile team's Scrum activities
- Work with operations to make sure that software is running optimally in production

Software Engineer • BANK OCBC NISP

Sep 2021 - Jan 2022

- Build high-quality reusable code that can be used in the future, Develop functional and sustainable API with clean codes.
- Analyze the technical feasibility of product features and help guide development from a technical perspective
- Participated in the development and release of at least one platform
- Effectively manage day-to-day tasks in an Agile process to meet scheduled commitments and participate in Agile team's Scrum activities
- Work with QA, product management, and operations in an Agile environment
- Opportunities to showcase your work on our tech blog and internal & external conferences

Software Engineer • PT Bussan Auto Finance

Nov 2018 - Aug 2021

- Executing full lifecycle software development, write well-designed, testable code, Develop software verification plans and quality assurance procedures, Document and maintain software functionality, Troubleshoot, debug and upgrade existing systems and Deploy programs and evaluate user feedback.
- Establish Openshift environment, Jenkins, Nexus Repo and Docker for production server, generate sandia (sales end to end system) backend.
- Good working knowledge of database concepts, schema design, performance tuning and SQL
- Work with QA, product management, and operations in an Agile environment

HIGHER EDUCATION

Bachelor of Computer Science

University of Gunadarma
2018

Diploma of Informatics Management

University of Gunadarm
2016

LANGUAGES

- English & Bahasa

SKILLS & ABILITIES

- 4+ years of professional software development experience
- Excellent communication skills with ability to work well cross-functionally across multiple department
- Strong Golang programming skills
- Strong JavaScript programming skills
- Good understanding of database structure
- Strong understanding of Containerize (Docker)
- Expertise in Container Orchestration (Openshift)
- Expertise in Automation Tools (Jenkins & Azure DevOps)
- Proven software development experience in open-source PHP web frameworks (Laravel & Codeigniter)

IT Staff • PT Bussan Auto Finance

May 2017 - Oct 2018

- Responsible for providing technical assistance and support related to computer systems, hardware, or software.
- Responds to queries, runs diagnostic programs, administrative systems access verification, isolates problem and query data on SQL Server.
- Monitoring production systems

COURSES

- The Tokopedia Way :
Delivering Hundrets of Daily
Deployments at Scale
- Openshift Administration I:
Containers & Kubernetes-
DO180 - Red Hat
